

# CLASSY® ProFile

Consolidated Treatment Documentation

MOSAIQ®

**CLASSY® ProFile automatically provides all relevant patient documents in a single PDF-A document to be archived. An ideal base for legally compliant long term archives.**

CLASSY® ProFile easily and comfortably summarizes different picture and text documents of a patient in one single PDF-Document.

CLASSY® ProFile easily integrates seamlessly into your existing workflow and maximizes your flexibility.

With only one click, you can use individual templates to provide a summary of all treatment information for different purposes:

- For the central document archive
- Disclosure to external handlers
- For evidence vis-à-vis the medical authorities
- Handing over to the patient
- Submission for the tumor conference
- And much more . . .

Patient information

Audit by medical authorities

Long Term Archiving

Installation is easy and straightforward on any Windows based client.  
CLASSY® ProFile is compatible with all current MOSAIQ®-Versions.

# CLASSY® ProFile

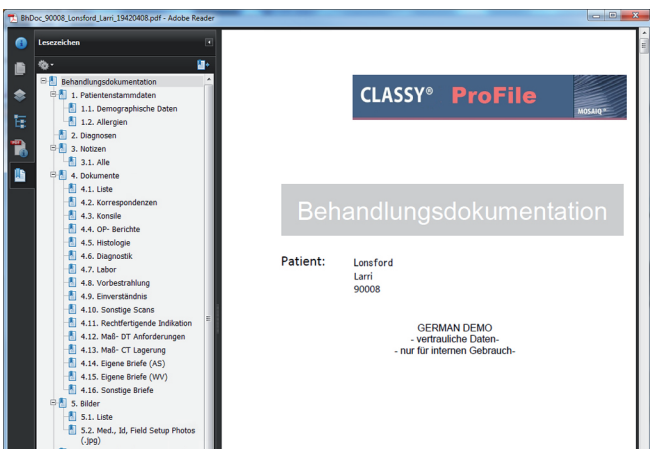

MOSAIQ®

## Professional Patient Documentation with one Click

Whether out of MOSAIQ®, a billing system or applications, with CLASSY® ProFile you are now able to merge all content of different programs automatically in one single PDF-Document! You determine the design.

CLASSY® ProFile is optimized for use in conjunction with MOSAIQ®:

You can call CLASSY® ProFile directly out of MOSAIQ® and it provides access to all stored plans, pictures, eScan- and eScribe documents. Through optional reports you can include all additional information of the MOSAIQ database.

You decide which documents will be archived automatically into your Document-Management-Systems (DMS) or to an external electronic archive system.

CLASSY® ProFile supports automatic archiving:

Creation of the PDF-Documents also generates meta data files, usable for automatic import into DMS or any other document archive and storage systems.

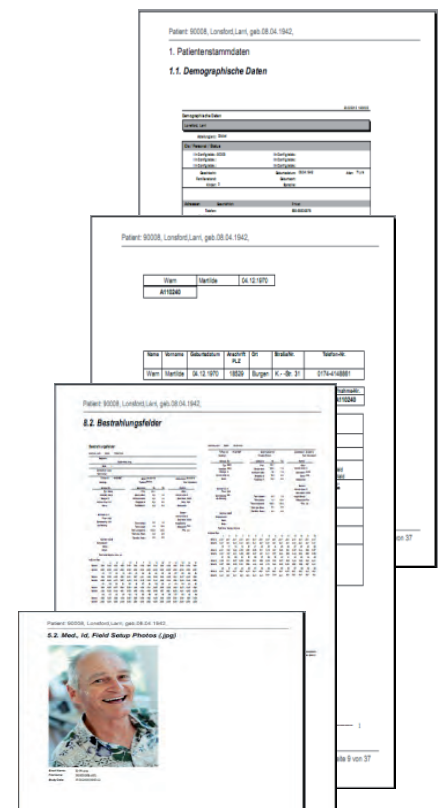

CLASSY® ProFile offers you security through:

- **PDF/A Document** format (ISO 1900-x) to meet legal and professional regulations for the minimum storage period of 30 years.
- **Access of treatment data**, even after access to the original IT-Systems is not possible.
- **Fulfill patient information duties** as well as information needs of insurances and other entitled institutions – guaranteed even in 30 years.

CLASSY® ProFile is quick and flexible:

- Document content and appearance is controlled by you with templates by request.
- An 80-page treatment documentation will be generated on average in less than 90 seconds.
- Mass-documents are generated without user intervention.
- MOSAIQ® QCL-Integration as well as server-based processing of all existing patients

Define your own templates and determine individual use and form of the information.
